

What to do after your vaccination

The vaccine will help protect you from Coronavirus but you can still spread the virus to other people Keep them safe by following the guidelines

Stay at home as much as you can

Work from home if you can

If you go out keep 2 metres apart from other people

Do not mix with other people unless you have to

Wash your hands a lot

Cover your face on public transport or in shops unless you are exempt

If you or someone in your house has symptoms you must self-isolate
